We provide our customers Innovative Fintech Banking, Insurance Products and Digital Services across on-premise, hybrid and cloud environment accelerating time to value and agility.

We will continue to leverage competencies and latest technologies. We are a new-edge technology company providing innovative IT solutions for BFSI customers globally. We offer wide range of established software products for Combating financial Crime such as Anti-Money Laundering Solution (iAML),

Trade Based Money Laundering (iTbML), Early Warning System (iEWS), Fraud Risk Management (iFRM) and Real time Transaction Monitoring (iRTMS). We also have Enterprise Wide Reconciliation and Settlement System built on International Security Standards - PA DSS certified, iConnect (payment middleware) and specialized services in the areas of application development.

We have a strong reputation in serving Banking Financial Services Insurance sector.

BRAND FRENZY

Our brand frenzy lies in striving to be the best and continuously innovating our products based on market needs. The desire to deliver value-led business outcomes and a differentiated portfolio of

services for digital transformation of our clients is what keeps us going. We leverage disruptive technologies such as Blockchain, Artificial Intelligence, Machine Learning and many more for our global clientele.

Our digital solutions are highly recognized across geographies. Through the years, our products have been widely sought out in the Banking Financial Services & Insurance industry and we have been consistently recognized and felicitated across platforms. We have an innovation-oriented work culture and maintain a balance in terms of technological innovation, employee satisfaction and creating business value.

Our differentiators are our core values of integrity, intelligence and ingenuity. These define our customer value creation and help us create digital transformations and customer satisfaction.

We are humbled by the support of all our stakeholders as we enthusiastically look forward to continuing this relationship in the years to come.

PANDEMIC TURN AROUND

COVID 19 has forced economies and companies to reinvent ways to do business and reach out to customers. To enable business to remain relevant they have had to reimagine the Customer touchpoints in a digital age with digital

speed to continue to attract and remain connected to their customers. Business has taken a step change to transition to digital technology for doing business. They are accelerating their pace of Digital transformation with the help of new age disruptive Technology. Harnessing the power of data has clinched the momentum for faster decision making. Analytics, Cloud enabled Digital transformations are the real drivers for High-performing organizations. The exponential growth in digitization has been driving the launch of fintechs with great speed. The FinTech revolution is driving the purchase decision or loan decision of the common man on one hand and hugely enabling the business decisions of companies

on the other hand. Riding on advanced technology businesses are bringing solutions to people in a secure, swift and abundant manner.

VISION FOR NEXT NORMAL

Consumers now demand a more convenient and secure way of banking. Physical banking is becoming less common. And, as we move forward, the digitalization of systems, processes, and services will continue at a rapid pace. Before the crisis, utilization was slow. But now, consumer adoption is accelerating and the need for digital transformation is driven by the growing need for contactless transactions. FinTechs had already begun to erode traditional models and COVID-19 has now imposed an even faster rate of change. We have also enhanced our digital product features for customer onboarding, global regulatory products and world class enterprise wide reconciliation & payments settlement system. We began the year with strategic plans to boost external business and concentrate on the key projects.

We are all set to grow and expand as a Fintech company.
